IBTA  
Jan 2014 – Apr 2019

### Web Front-End Developer

Udacity  
Jan 2018 – Apr 2018

## S K I L L S

## E X P E R I E N C E

### Hyphen Digital Experience

Jul 2021 – Present | Frontend Developer

Project: NBB – National Bank of Bahrain

Banking system development using Angular 11 and the Backbase Engagement Banking Platform (EBP).

I work in parallel with the UI/UX team, providing and developing the best user interface according to the client. Work with mixed team (backend, QA, frontend, mobile iOS, mobile Android, UI/UX)

### Banco Bradesco

Mar 2021 – Jul 2021 | System Analyst

Project: Salesforce credit recovery (Marketing cloud), tax-benefit system, and RCB credit recovery.

Project management with a focus on credit recovery, requirements analysis, solution design, delivery management.

### Tata Consultancy Service

Mar 2020 – Feb 2021 | Fullstack Developer (Angular)

Project: PIX – A new way to make transfers and payments instantly and that works every day of the year.

Sustainable and reusable Angular system development to meet customer needs. Work on technology improvements and implementations in support of business processes. Development of microservices (JSF and Spring boot) for integration with Banco Central data. Development of the Internet Banking interface (Angular 7, 8, 9) and integration with microservices.

### 4CADIA

Jun 2019 – Dec 2019 | Full-Stack Developer

Project: Ethereum and Bitcoin gateway – analysis of transaction and fee blocks to collect fees correctly.

Development of the system to get the correct rate values for each transaction made on the Atlas Quantum platform.

### WINTAYLOR – Workforce Optimization

Feb 2019 – Jun 2019 | Java Developer

Project: Workforce Management System – cost reduction and productivity increase.

Development of a dashboard to display customer workforce data to assist in decision-making and data visibility.

### FITec

Apr 2018 – Feb 2019 | Java Developer

Project: Revenue Manager – Billing System.

Development of microservices of accountability systems. Monitoring of delivery via CI / CD.

### Focusnetworks – OnLife Business Group

Jan 2018 – Apr 2018 | Java Developer

Project: Hyper Class – Good Architecture and Development Practices.

Study and development of software according to best practices and pillars of object orientation, clean code and Domain Driven Design. Spring Framework, Design Patterns, Design Principles, S.O.L.I.D, Clean Code, DDD (Domain Driven Design), TDD.
